Researchers at Stanford University are studying brain development and behavior.

Your child can help and gain first hand experience in research and science!

For more information or to participate contact: Soujanya Gade.
Phone: (650)724-2951
Email: sgade@stanford.edu

Participation Involves:

• Comprehensive cognitive and behavioral evaluation
• MRI Scan (safe and non-invasive, no x-rays/radiation)

Potential Benefits:

• Discussion and written report of results from evaluation
• Copy of images from your child’s brain MRI
• Access to ongoing updates about outcomes of the study

You will receive a $150 honorarium for participation

The Early Childhood/School Age Brain Development Study:

This study is an NIH-funded research project aimed to increase our understanding of the brain during a critical time of a child’s growth. Information learned from this research can ultimately contribute to early intervention services.
