Developmental Brain Investigations

at the

Center for Interdisciplinary Brain Sciences Research

We are looking for **8-12 year old children** for research studies exploring brain development in children. Anticipated duration is three separate one-hour sessions.

---

**Participation involves evaluation including:**

- Self-reports and behavioral tasks.
- Brain imaging with fNIRS. Scans are safe, non-invasive and do not use X-rays or radiation. They are used to look at brain function.

**You will receive:**

- Information from behavioral assessment, with a research report of the assessment results upon request.
- Access to ongoing updates about the study.
- Total payment of $75 for your participation.

---

For more information, or to enroll in the study, please e-mail msch@stanford.edu.
